

Pool Maintenance - System Chem Check

Description

Our system chem check service provides professional chemistry and circulation management. An excellent service for indoor or covered pools where debris load is light. A great add-on service for our full service customers who have seasonal properties.

Services Include

- Test and adjust water chemistry as needed, (chemicals sold separately).
- Fill feeders and adjust as needed.
- Clean pump and skimmer baskets of debris as needed.
- Backwash sand filter as needed.
- Operating review of all pool circulation equipment.
- Start of make-up water as required (if automated or shut-off person is available).

Options

- Additional full service or system chem check days can be added as needed – ideal for seasonal properties.
- Vacation plan services - provide peace of mind knowing your pool will be maintained while you are away.
- Deck power washing - removes dirt, grime, mold and mildew, which can lead to slippery surfaces.
- Filter deep cleaning maintains water clarity and helps system to work efficiently.

Notes

- Service maintenance options range from once a month to 7 days a week.
- Pool bather load, landscape surround may require additional days to assure quality.
- Technicians are available 24/7/365 for emergency service through our customer care call center.
- We will notify you immediately of any unsafe conditions or system malfunctions.
- All pool supplies and chemicals provided on an "as needed" basis and added to your bill.
- Recommended as an additional day visit added to any 1 per week or 2 per week plan.
- All these services may not need to be performed in their entirety at each visit.
- It is the customers responsibility to inform Poolblu of the date of last service.

Availability

- Available in all North and Central American markets.
