

## Spa Maintenance - Full Service

### Description

Complete full service maintenance for residential spa owners. Maintaining ideal water conditions for any residential spa REQUIRES owner involvement if service requested is less than 1 Visit per Week Maintenance. The service provided by Poolblu is only supplemental to an owner's normal, ongoing spa maintenance.

### Services Include

- Vacuum loose particles from spa bottom surface.
- Brushing of spa walls.
- Cleaning of the water line (tile line).
- Cleaning of skimmer basket.
- Test and adjust water chemistry, fill feeders, adjust feeders and automation as needed.
- Clean filter media as required.
- Operating review of all circulation equipment.
- Wipe down cover.
- Add of make-up water as required (if automated or shut-off person is available).

### Options

- Additional full service days can be added as needed – ideal for seasonal properties.
- Vacation plan services - provide peace of mind knowing your spa will be maintained while you are away.
- Deck power washing removes dirt, grime, mold and mildew, which can lead to slippery surfaces.
- Filter deep cleaning maintains water clarity and helps system to work efficiently.

### Notes

- Full service maintenance options range from once a month to 7 days a week.
- Spa bather load, landscape surround may require additional days to assure quality.
- Technicians are available 24/7/365 for emergency service through our customer care call center.
- We will notify you immediately of any unsafe conditions or system malfunctions.
- All these services may not need to be performed in their entirety at each visit.
- All pool/spa supplies and chemicals provided on an "as needed" basis and added to your regular monthly bill.

### Availability

- Available in all North and Central American markets.
